"Lets try a fight with the gigantic pike that hunts as effective in the Baltic sea as in the rivers and lakes of the deep forests. Sneak up on the shy trout and grayling that you will find hiding in rivers and lakes from the forest region up to the mountain area. Try out Your equipment against the Baltic salmon and seatrout that dwells in the coastal rivers."  
Lapland fishing

A nice place to read about and getting tip about fishing in southern Lapland. Lapland Fishing is mainly finaced by EU and the county administration board of Vasterbotten. The area in southern Lapland is very interesting when it commes to fishing.

Its not a coincidence that the European Flyfishing Championship 2004 and the World Fly-fishing Championship 2005 was held in this region. After the success of WFFC 2001 this area is of great current interest when it comes to the quality of fishing.

We kan strongly recomend this fishing paradise and wish you a time well spent.
